# Subject Index to Volume 137

**Thermal and fluid design**

Experimental comparisons for bottom reflooding in tight LWHCR and standard LWR geometries, N. Rouge, J. Dreier, S. Yanar and R. Chawla 137 (1992) 35
Simulation tests for temperature mixing in a core bottom model of the HTR-Module, G. Damm and R. Wehrlein 137 (1992) 97
A comparative study of the various nuclear radiations used for void fraction measurements, A.A. Kendoush 137 (1992) 249
Analysis on the mathematical structure of the nonlinear BWR model, H. Wang and S. Kondo 137 (1992) 267
Results of HDR-experiments for pipe loads under thermally stratified flow conditions, L. Wolf, W. Häfner, M. Geiss, E. Hansjosten and G. Katzenmeier 137 (1992) 387

**Fluid dynamics**

Theoretical and experimental investigations into the safety behaviour of small HTRs under natural convection conditions, H. Barthels, W. Rehm and W. Jahn 137 (1992) 199

**Engineering mechanics**

Creep collapse of a heat transfer tube subjected to external pressure at high temperatures, I. Ioka, Y. Kaji, Y. Miyamoto and I. Nishiguchi 137 (1992) 259
Evaluation by fracture mechanics of ultrasonic indications in turbine and generator rotors, K.H. Mayer, C. Berger, D. Heinrich and B. Scarlin 137 (1992) 277
Static and cyclic crack growth of low alloy steels in high-oxygen water simulating HDR test conditions, H. Hänninen, P. Aaltonen, R. Rintamaa, E. Arilahti and U. Ehrnstén 137 (1992) 291
Predicting crack arrest in reactor pressure vessels, E. Smith and T.J. Griesbach 137 (1992) 305
Determination of the dynamic fracture toughness using a new stress pulse loading method, H. Stroppe, R. Clos and U. Schreppel 137 (1992) 315
Investigations in fracture mechanics failure concepts with thermomechanically rolled steels, K.E. Hagedorn and M. Eckel 137 (1992) 343
Material hardening under multiaxial creep loading, H.J. Penkalla, F. Schubert and H. Nickel 137 (1992) 355
Assessment of the residual time to rupture of fuel pins after reactor core disturbances using the Lebensanteil rule, L. Schäfer and C. Wassilew 137 (1992) 371
Long-term integrity of main pressure boundary components in the first generation of NPPs in Czechoslovakia, J. Ždárek, L. Pečínka and M. Brumovský 137 (1992) 379
The load bearing capacity of large pipes containing part-circumferential flaws under tensile loading. A comparison of experiments and analytical approximation methods, W. Stadtmüller, U. Eisele, P. Julisch and D. Sturm 137 (1992) 405
Crack growth tests on pipes with circumferential defects under internal pressure and superposed alternating bending load, W. Stoppler, D. Sturm, K. Hippelein, A. de Boer, K. Kerkhof and H. Sommer 137 (1992) 419
Mitigation of degradation mechanisms affecting CANDU pressure tubes, L.A. Simpson and C.E. Coleman 137 (1992) 437
Ductile crack growth under a PTS event, H. Okamura, G. Yagawa, T. Kawakami, Y. Urabe, M. Sato and J. Sano 137 (1992) 457
Fatigue analysis for analytically overloaded piping components and valves in nuclear power plants, B. Charalambus 137 (1992) 449

**Materials properties**

Developments in PWR cladding corrosion: materials and models, A.R. Massih and G. Vesterlund 137 (1992) 57
Spatial fluxes and energy distributions of reactor fast neutrons in two types of heat resistant concretes, T.S. Akki, S.A. Benayad and R.M. Megahid 137 (1992) 77

Static and cyclic crack growth of low alloy steels in high-oxygen water simulating HDR test conditions, H. Hänninen, P. Aaltonen, R. Rintamaa, E. Arilahti and U. Ehrnstén 137 (1992) 291
Determination of the dynamic fracture toughness using a new stress pulse loading method, H. Stroppe, R. Clos and U. Schreppel 137 (1992) 315
Manufacture and characteristics of a heavy section steel test plate with changing mechanical properties in the through-thickness direction, Y. Mishima, T. Kawakami, M. Satoh, Y. Urabe, J. Sano, T. Fukuda, M. Kusuhashi, I. Sato and K. Suzuki 137 (1992) 323
Investigations on strength and ductility of base metals and welded joints of steels for power plants at elevated temperatures, W. Dahl and C. Kalwa 137 (1992) 335
Investigations in fracture mechanics failure concepts with thermomechanically rolled steels, K.E. Hagedorn and M. Eckel 137 (1992) 343
Material hardening under multiaxial creep loading, H.J. Penkalla, F. Schubert and H. Nickel 137 (1992) 355
Experience of irradiation embrittlement in the Loviisa reactor pressure vessels, R. Ahlstrand and M. Valo 137 (1992) 433
Mitigation of degradation mechanisms affecting CANDU pressure tubes, L.A. Simpson and C.E. Coleman 137 (1992) 437

**Mechanical design, component fabrication and testing**

BWR steam line and turbine model with multiple piping capability, H. Anglart, S. Andersson and R. Jadrny 137 (1992) 1
Evaluation of damping values of a piping system with regard to damping values used in design codes, D. Schrammel and H. Steinhilber 137 (1992) 11
Evaluation by fracture mechanics of ultrasonic indications in turbine and generator rotors, K.H. Mayer, C. Berger, D. Heinrich and B. Scarlin 137 (1992) 277
Manufacture and characteristics of a heavy section steel test plate with changing mechanical properties in the through-thickness direction, Y. Mishima, T. Kawakami, M. Satoh, Y. Urabe, J. Sano, T. Fukuda, M. Kusuhashi, I. Sato and K. Suzuki 137 (1992) 323
First attempts towards the early detection of fatigued substructures using cyclic-loaded 20 MnMoNi 5 5 steel, G. Dobmann and A. Seibold 137 (1992) 363
The load bearing capacity of large pipes containing part-circumferential flaws under tensile loading. A comparison of experiments and analytical approximation methods, W. Stadtmüller, U. Eisele, P. Julisch and D. Sturm 137 (1992) 405

**Reactor concepts and systems analysis**

Upgrading and modernization of the High Flux Reactor Petten, J. Ahlf and J. Schinkel 137 (1992) 49
Research program and test loop for the prototype of a HTR coolant gas circulator with magnetic bearings "MALVE", P. Bührer, C. Duttke, J. Engel and D. Glass 137 (1992) 83
Recriticality of the HTR-Module Power Reactor after hypothetical accidents, T. Kindt and H. Haque 137 (1992) 107
The safety of Modular High Temperature Gas-Cooled Reactors, P.R. Kasten 137 (1992) 171
Safety and licensing of the PRISM Liquid Metal Cooled Reactor, G.L. Gyorey, R.W. Hardy and P.M. Magee 137 (1992) 181
The SLOWPOKE licensing model, V.G. Snell, F. Takáts and K. Szivós 137 (1992) 191
Theoretical and experimental investigations into the safety behaviour of small HTRs under natural convection conditions, H. Barthels, W. Rehm and W. Jahn 137 (1992) 199
Aerosol formation by graphite corrosion in case of water and air ingress to the core of a High-Temperature Reactor, K. Kugeler, C. Epping, P. Schmidtlein and P. Schreiner 137 (1992) 213
The influence of the chemical state of the fission products on the filter properties of the graphite components, H. Barthels, C.-B. Von Der Decken and N. Iniotakis 137 (1992) 221
Long-term integrity of main pressure boundary components in the first generation of NPPs in Czechoslovakia, J. Žďárek, L. Pečínka and M. Brumovský 137 (1992) 379

**Radiation shielding**

Loading of particulate filters for nuclear reactors, F.P. Berger and K. Chong 137 (1992) 25
Calculation of neutron fluence in the region of the pressure vessel for the history of different reactors by using the Monte-Carlo-method, H.-U. Barz and W. Bertram 137 (1992) 71
Spatial fluxes and energy distributions of reactor fast neutrons in two types of heat resistant concretes, T.S. Akki, S.A. Benayad and R.M. Megahid 137 (1992) 77

Retention factors for fission products from sodium tests to simulate a severe LMFBR accident, J. Minges, H. Sauter and W. Schütz 137 (1992) 133

**Nuclear waste management and disposal**

Testing of techniques for the conditioning of fuel elements in view of direct disposal, H. Sterner, R. Jung and B. Schulte 137 (1992) 139
Operation of the Pamela high-level waste vitrification facility, H. Wiese and M. Demonie 137 (1992) 147
System analysis dual-purpose repository – New results of temperature calculations, E. Biurrun, J.P. Lempert and H.-J. Engelmann 137 (1992) 153

**Core physics and fuel design**

The Halden corrosion cycling experiment IFA-560.2. Experimental results and their interpretation, W. Beck, G. Böhner and R. Eberle 137 (1992) 65
Meeting fuel temperature limits in an HTR-Module Reactor during depressurized core heat-up, N. Kohtz and H. Haque 137 (1992) 115
Improving power and cost-effectiveness at the Gösgen Nuclear Power Plant by increasing the length of the active pellet stack, H. Bröskamp, H.-P. Fuchs, W. Hiltrop, W. Kollmar and G. Meier 137 (1992) 125
Testing of techniques for the conditioning of fuel elements in view of direct disposal, H. Sterner, R. Jung and B. Schulte 137 (1992) 139
The safety of Modular High Temperature Gas-Cooled Reactors, P.R. Kasten 137 (1992) 171
Modeling of fission product release from HTR fuel for risk analyses, J.M. Bolin, T.D. Dunn, K. Verfondern and M.J. Kania 137 (1992) 207
Aerosol formation by graphite corrosion in case of water and air ingress to the core of a High-Temperature Reactor, K. Kugeler, C. Epping, P. Schmidtlein and P. Schreiner 137 (1992) 213
The influence of the chemical state of the fission products on the filter properties of the graphite components, H. Barthels, C.-B. Von Der Decken and N. Iniotakis 137 (1992) 221

**Nuclear safety**

Review of the safety concept of the HTR 2 module reactor plant, H. Helmers and H. Knieper 137 (1992) 89
Recriticality of the HTR-Module Power Reactor after hypothetical accidents, T. Kindt and H. Haque 137 (1992) 107
Meeting fuel temperature limits in an HTR-Module Reactor during depressurized core heat-up, N. Kohtz and H. Haque 137 (1992) 115
Learning and nuclear safety: New reactors and US regulation, E. Nichols and A. Wildavsky 137 (1992) 163
Safety and licensing of the PRISM Liquid Metal Cooled Reactor, G.L. Gyorey, R.W. Hardy and P.M. Magee 137 (1992) 181
The SLOWPOKE licensing model, V.G. Snell, F. Takáts and K. Szivós 137 (1992) 191
Simplified methodology for assessing the risk impact of potential performance improvements for the dry pressurized water reactor containment, D.L. Kelly, D.J. Pafford, J.A. Schroeder and K.R. Jones 137 (1992) 229
Analysis on the mathematical structure of the nonlinear BWR model, H. Wang and S. Kondo 137 (1992) 267
